

Prerequisite:

- 1.Create an object : "Electronic Products"
- 2.Fields : Name, Price, Type (Picklist: Mobile, LED, AC)
- 3.Add some 20 approx records covering all above various values / combinations

=====

Business Problems:

1.

Take a backup of data present in the "Electronic Products" object for safety.(only active records)

2.

Take a back up of above objects where active as well as deleted records, both needs to be backup.

3.

Assume you got a file from another team (Say, Oracle).

Columns: Oracle_ID, Oracle_Name, Oracle_Pr, Oracle_type

It has some records.

Modify the file in such a way, that you can use it for Insert.

And field mapping needs to be happen by auto-match.

4.

As per new business policy, Mobile product price will see 20% increase.

Modify the data using data loader.

5.

As per new budget declaration by Govt, LED TVs will have 5% reduction in price.

On the same time, you need to add some 5 new records for Product object as Samsung launched 5 new LED sets.

Prepare a SINGLE file which will do both activities in one process.

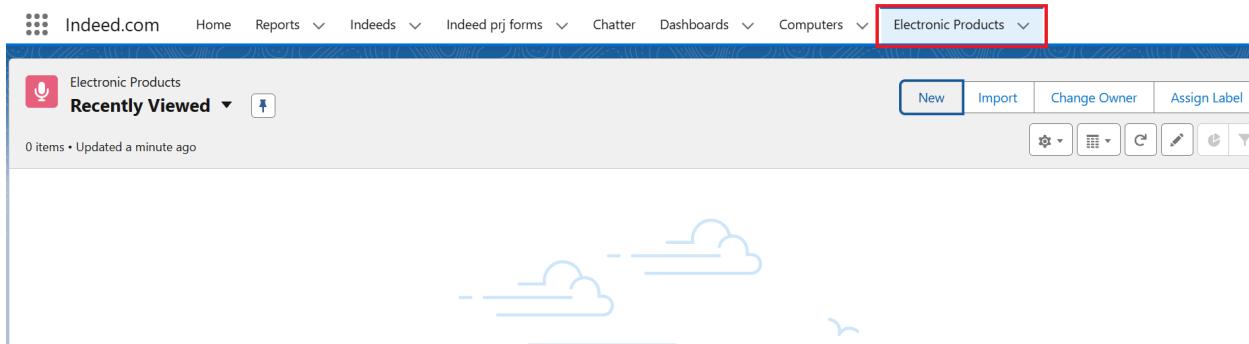

6. Company stopped selling ACs and the business us being outsourced now.

Delete all AC records.

3. Data from the client Oracle file, and Insert and field mapping in Salesforce

Customer data Oracle

The screenshot shows a Microsoft Excel spreadsheet titled "Data from Oracle from client". The table has columns labeled A through F. Column A contains "Oracle_ID", column B contains "Oracle_Na", column C contains "Oracle_Pr", column D contains "Oracle_type_c", column E contains "Name", and column F contains "Price". The data rows are as follows:

	Oracle_ID	Oracle_Na	Oracle_Pr	Oracle_type_c	Name	Price
1	111	abc	1200	ghkj		
2	222	def	1500	kgm		
3	333	ghi	600	xcf		
4	444	JKL	1800	asd		
5	555	mno	2000	trr

20						

The screenshot shows the "Fields & Relationships" section of the Salesforce Setup interface for the "Electronic Product" object. The sidebar on the left lists various setup categories, and the main area displays a table of fields. The table includes columns for "FIELD LABEL", "FIELD NAME", "DATA TYPE", and "CONTROLL". The fields listed are:

FIELD LABEL	FIELD NAME	DATA TYPE	CONTROLL
Created By	CreatedBy	Lookup(User)	
Last Modified By	LastModifiedBy	Lookup(User)	
Name	Name	Text(80)	
Owner	OwnerId	Lookup(User,Group)	
Price	Price_c	Currency(18, 0)	
Type	Type_c	Picklist	

Changed the columns with API names of electronic products object fields which are related

6. Delete all AC records

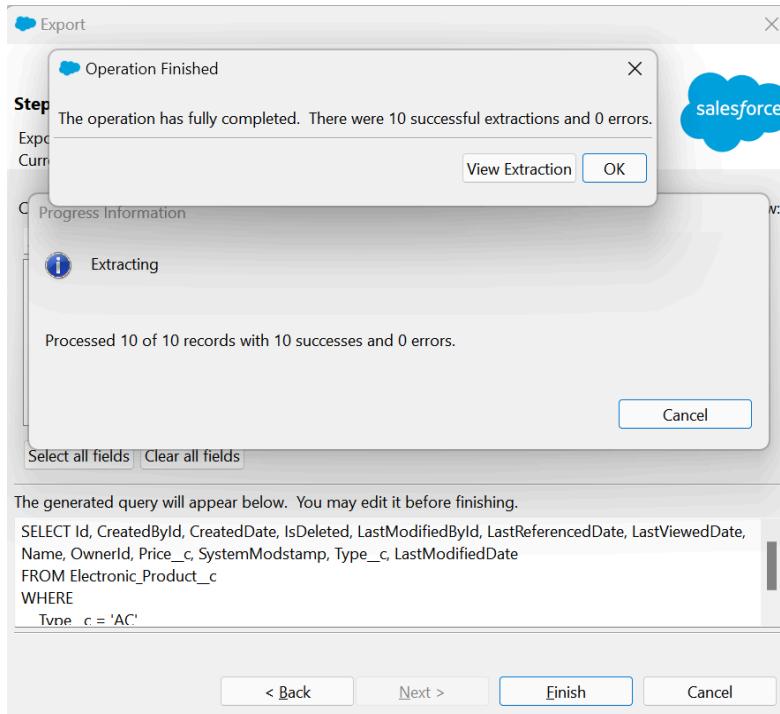

Export file for backup

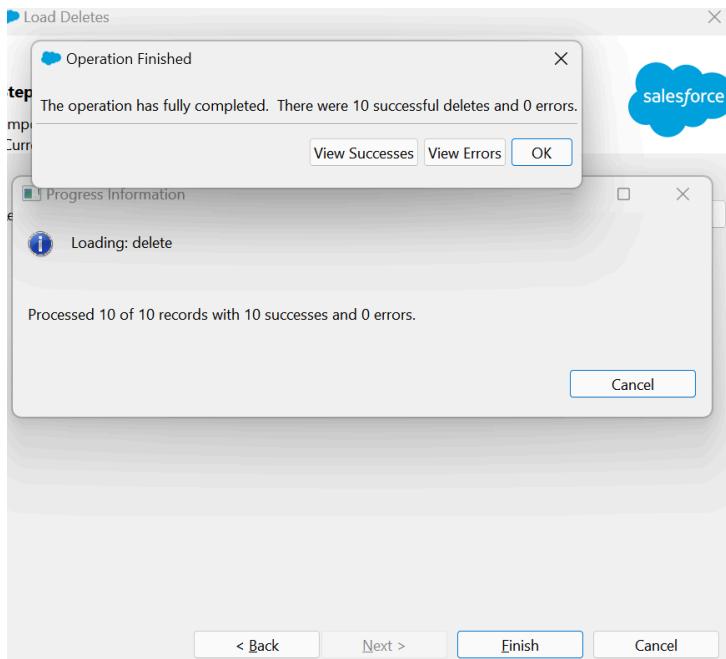

Before deleting records we have 10 records with Type AC in Electronic products object

The screenshot shows the Salesforce list view for the "Electronic Products" object. The top navigation bar includes "Indeed.com", "Home", "Reports", "Indeed", "Indeed prj forms", "Chatter", "Dashboards", "Computers", and "Electronic Products". A green notification bar says "List view updated.". The main area displays a table of 10 records, each with a checkbox and a name: 1. abc, 2. def, 3. glaxal, 4. insulator, 5. panasonic, 6. SamsungAC, 7. Smartwing, 8. tissort, 9. Tosut, 10. whirpool. A red box highlights the first record, "abc". To the right of the table are "New", "Import", "Change Owner", "Printable View", and "Assign Label" buttons, along with various filter and sort icons. On the far right, there's a "Filters" sidebar with a single filter: "Type equals AC", which is also highlighted with a red box. Other options in the sidebar include "Add Filter", "Remove All", and "Add Filter Logic".

10 records extracted
